

REQUIREMENTS DOCUMENT

General information:

developer		value	
start date		final date	

IMPORTANT WARNINGS:

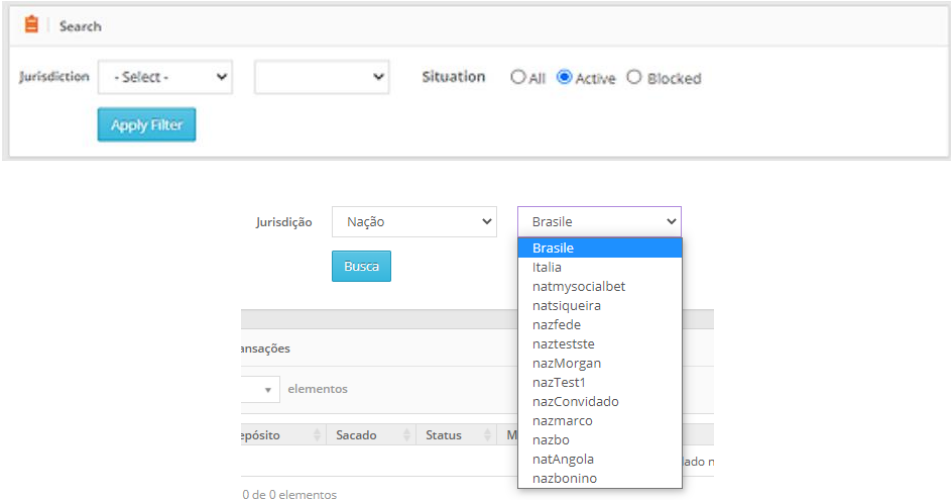

- a) this work will be finished only when it has been tested online in our website;
- b) during the implementation, some ideas can be adjusted/improved and it doesn't mean that the price and deadline should be changed; the exception about this is if the change needs a restructuring for its development;
- c) all texts shown to the website users has to be in all languages available at our translation system;
- d) each function should be responsive (layout adaptable to any device).

Requirements details:

Below at the left, the reference back office access and, at the right, the back office to be created:

admin.mysocialbet.com
user: AssTest1
password: ab123456

function	Create Player List
detailed description	<p>On menu Players (which is Client now and the name have to be changed), create the page Player List, which will be visible only for Cassino, Clubs and the jurisdictions which Cassino gives the permission.</p> <p>In this page, at the top of the page, user should be able to filter by jurisdiction (except club, which can see only own players). Is possible to choose All jurisdictions or, on choosing the jurisdiction type, can select All of that level or just a specific one (same field as Reports/Transactions page). On doing this, will see the players (user.jurisdictionId = 7) under that jurisdiction. Should be some radio buttons to select the situation of the players to be filtered as All, Active, or Blocked. Use a traced at the name of the blocked Players. This filter should be like the next image:</p>  <p>On applying the filter, should appear all players under that tree in a table like the example below:</p>

The columns in this table should be:

Last Name, Name, Username, E-mail

Country, City

Registration Date, Last Login, Number of Logins (for this is necessary to create the function in this document: Create Login System)

Credits

Deposits, Withdrawals, Balance (red for lesser than 0)

Total Betting Amount, Betting Win Amount, Betting Balance (red for lesser than 0)

Jurisdiction tree

Actions

On Actions column, these are the available buttons:

Key icon → used to reset password with a confirmation modal, sending the new password by e-mail (there is already a method at the backend which send message by e-mail, use that as example) and showing the new password only if Cassino (user.jurisdictionId = 1) is who has made the reset. The new password should be random alphanumeric with max 8 characters and alpha in lower case, not with special characters.

Password Reset

Username

Items per page: 5 1 - 3 of 3 < > >>

Withdraw Request is the place where administrator can see the withdraw request made by the user in the website and can change status and description for the payments.

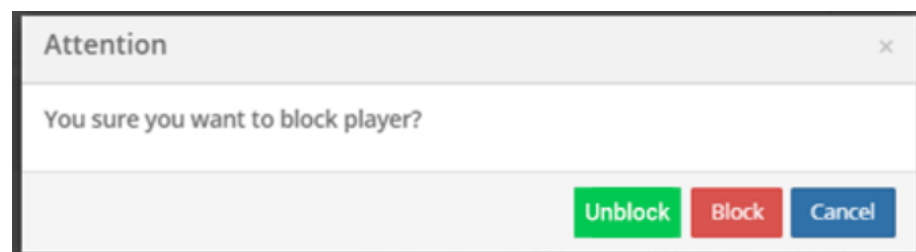

On clicking to edit a line, user should be able to set the modifications like the image above.

Info icon → open the page with all transactions related to that user (same information as page Transactions in the website at MANAGEMENT/TRANSACTIONS).

Block icon → blocks the player putting him as inactivated (Deleted field as 1 on UsersAdmin); use a modal to confirm the action; Unblock button should be visible only for Cassino.

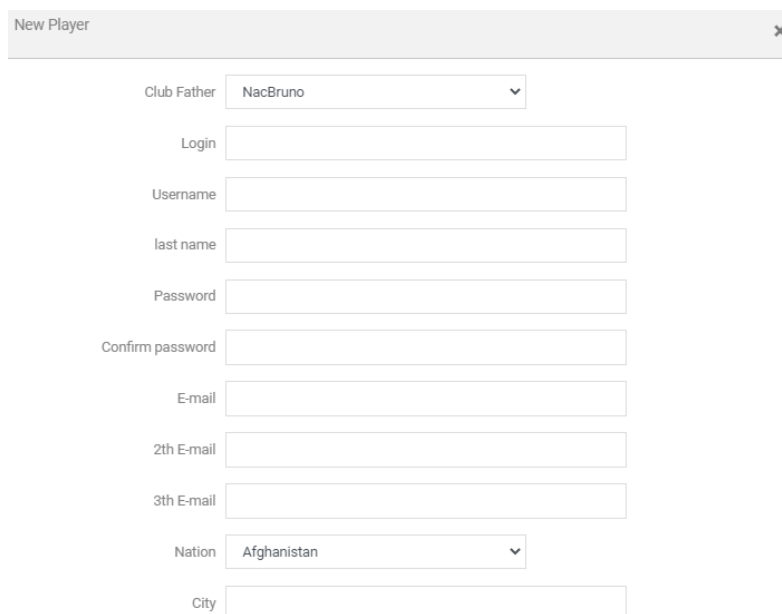

function	Create Login System
detailed description	Create a login system to register each time a user log in the website. For this, create a model on backend (and database table) with the name LogsUsers and the fields should be UserID, DateTime and IP.

function	Register User Creation DateTime
detailed description	Save the RegisterDateTime on the UsersAdmin table always that a new user is created, via website user (MENU MANAGEMENT/USER), via own registration at the website (BUTTON REGISTER AT WEBSITE HOMEPAGE), via New Administrator at back office (SETTINGS/MY ADMINISTRATOR) and via New Player at back office (CLIENTS/NEW PLAYER, which is the next function in this document to be created).

function	Create New Player Page
----------	------------------------

detailed description

In this page user will be able to create a new player below some of their clubs and upload his documents too (optional). After creating it, user should receive his password via e-mail (this method already exists on the backend, just need translation and text adjusts). The forms in this page could be like this:

A form titled "New Player" with a close button (X) in the top right corner. The form contains the following fields:

- Club Father: A dropdown menu with "NacBruno" selected.
- Login: A text input field.
- Username: A text input field.
- last name: A text input field.
- Password: A text input field.
- Confirm password: A text input field.
- E-mail: A text input field.
- 2th E-mail: A text input field.
- 3th E-mail: A text input field.
- Nation: A dropdown menu with "Afghanistan" selected.
- City: A text input field.

The fields in this form should be as below (* for required fields):

Username * (not possible if already exists in the system)

Name

Last Name

Password (visible only by Cassino)

Confirm Password (visible only by Cassino)

E-mail * (not possible if already exists in the system)

E-mail 2

E-mail 3

Gender

Birth Date

Address

City

Country

Zip Code

Phone

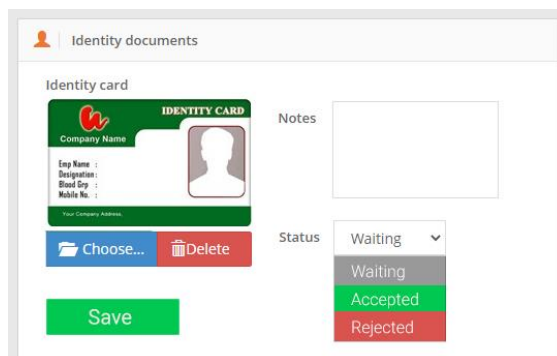

Phone 2

Cel phone

Whatsapp *

Notes

Access: Enabled/Disabled

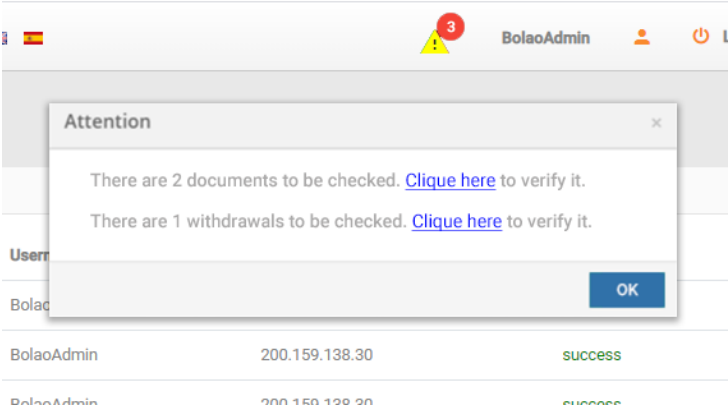

A form titled "Identity documents" with a close button (X) in the top right corner. The form contains the following fields:

- Identity card: A section with a preview of an identity card and a "Choose..." button.
- Notes: A text input field.
- Status: A dropdown menu with "Waiting" selected.
- Buttons: "Save", "Delete", and "Accepted" (highlighted in green).

On Documents Part, user can upload and edit the document data. That is, user should be able to create a player already with his documents updated (Identity

	Card (front), Identity Card (back), Proof of Address, Selfie With Identity, Selfie With Paper).
--	---

function	Create Warning Message
detailed description	<p>On logging, only Cassino should receive a warning message for the situations below, and at this message, a link straight to the page for each resolution (except for third option which doesn't exist on back office yet):</p> <ol style="list-style-type: none"> 1- When there are documents to be Accepted or Rejected; 2- When there are withdrawals requests at Waiting status; 3- When there are rounds results to be posted; <p>This waring should be a badge and, on clicking it, should appear a message like the example:</p> 

function	Alter Document List
detailed description	Alter in the website to be able to send the back of the Identity Card (now there's only a field for Identity Card).

function	Create A Documentation
detailed description	After doing the tasks above, create a documentation to explain all technical aspects about what was made, such as database modifications, backend modifications, frontend modifications, used APIs, etc.
